

SmartLic, The Proven Fly Control Program!

Beat The Big Fly Problem with SmartLic IGR Supplements!

Horn flies can cause big problems for cattle and cattle producers. Cattle expend high levels of energy fending off biting horn flies. The result can be devastating to your herd. Significant weight loss and poor cattle development are just two of the many issues that horn flies cause. SmartLic supplements can you win the battle against horn flies!

SmartLic FlaxLic IGR, NE-22 IGR and MinLic IGR supplements fortified with Altosid® can help reduce horn fly populations by breaking the life cycle of the fly, preventing the development of biting adult flies.

Contact Matthew at North Country Feeds today and start winning the battle against horn flies!
